SANOSIL[®] AQUA-PHOS BP

WATER FILTRATION SYSTEM

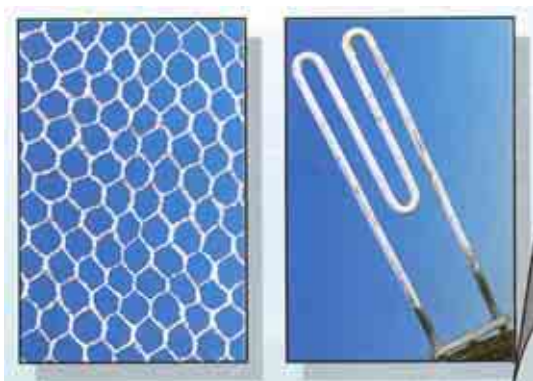

SANOSIL[®] AQUA-PHOS BP prevents corrosion and scaling and removes all substances in suspension in the water (mud, sand, metal oxides, etc.).

SANOSIL[®] AQUA-PHOS BP is indispensable in heating circuits, tap water and refrigeration systems and all types of equipment and installations in contact with water.

HARD WATER

LIME = SCALING

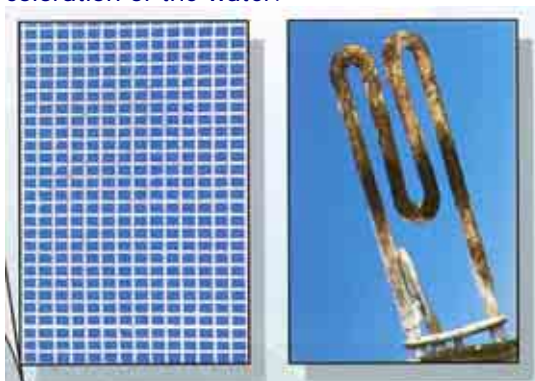

Lime is a source of trouble. It quickly forms scale on any surface in contact with water, thus diminishing their life span by at least a third.

SOFT WATER

RUST

Dissolved gases in the water cause rust on all machines and pipes. The effects on the span of life of the product are similar to those of scaling, furthermore producing the unpleasant red coloration of the water.

INSTALLATION:

SANOSIL[®] AQUA-PHOS comes with an installation and by-pass kit. The device is to be installed where the water enters your home, after the water meter and before the points of use.

WARNING:

When installing your SANOSIL[®] AQUA-PHOS, avoid:

- direct light
- areas exposed to high temperatures
- water pressure above 8 kg/cm²

DURATION OF THE CARTRIDGES:

- sediment cartridge: approx. 1 year
 - silicon phosphate cartridge: 200 m³ with a dosage of 5 gr/m³
- Refill when the water reaches the red line!

TECHNICAL SPECIFICATIONS:

Flow rate:	700 l/h	Connection:	¾" internal gas thread
Degree of filtration:	20 micron	Max. working pressure:	8 bar
Max. operating temperature:	30°C	Max. room temperature:	40°C
Dimensions:	135 x 295 x 365 mm (length x width x height)		
Weight:	3.3 kg, unpacked		
Operating Instructions:	Sano 49/en
